The Corvette America Seat Conversion Kit #43954 makes it possible to install 1997-2013(C5/C6) Corvette seats into a classic 1968-1982 (C3) Corvette utilizing the original seat tracks and mounting points. Acquired C5/C6 seats will have to be slightly modified for the seat conversion to fit properly. You may choose to use the acquired C5 or C6 seats as is and install using the 1968-1982 Corvette Seat Conversion Adapter Kit (#43954) or you may choose to restore and/or customize the seats using Corvette America's seat products. We can provide seat foam and covers to suit your individual seating needs. We supply seating packages to include seat foam sets and seat covers in 100% leather in OE colors for either C3, C5, or C6. If you're looking for a completely custom look, Corvette America can provide a variety of leather colors, as well as thread colors. We also embroider eleven different GM Licensed Logos, and do custom embroidery (digitizing fees apply). If you have any questions about seat conversion, seat packages or general seat questions, please call our toll free number to speak with a Corvette America Representative. The power features built into the C5/C6 seats will not be functional after the installation of this conversion kit. Due to the C5/C6 seat bottom height difference from the C3 seat, head height clearance will be affected. SEATS ARE NOT INCLUDED AS PART OF THIS KIT AND MUST BE ACQUIRED SEPARATELY.

1968-1977 Dash Shields

Corvette America Dash Shields and Covers are available in all original colors.

What sets Corvette America's Dash Shields apart from the rest? First, our Dash Shields are constructed using the same ABS material we use in our reproduction Dash Pads. That means no paint to scratch or fade. This Dash Shield is the correct color and it stays that way. Second, for 1970-1977 Corvettes, we put the speaker holes in the right place — no more muffled sounds due to improperly located holes or misshapen patterns. Dash Shields are a great fix at a great price. And they're simple to install with the supplied adhesive.

Keep the original look. Add Black Ice...

Black Ice Coating for High Performance Aluminum Radiators

Black Ice Coating is a special epoxy that adheres to aluminum without peeling or flaking. It is only 3-5 mils thick and it DOES NOT affect the cooling performance of the aluminum radiator. The semi-gloss finish resembles the older enamels used on copper/brass radiators to keep that original look under the hood.

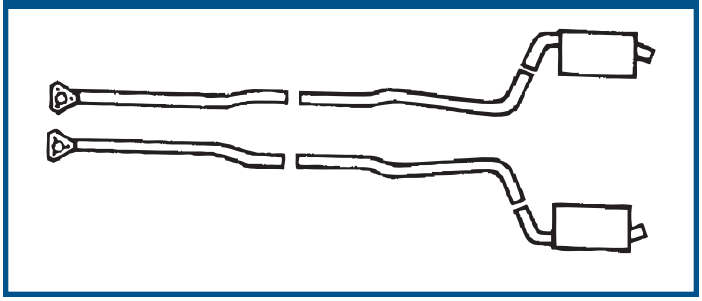
1968-1974 DUAL EXHAUST SYSTEM



Aluminized Exhaust Systems

Corvette America Aluminized Mufflers & Exhaust Pipes, made of long-lasting aluminized steel (65% Stainless Steel, 25% Aluminum, 10% Carbon) are the correct size and fit for your Corvette. We also offer complete Exhaust Systems that include header pipe flanges, sleeves, donut gaskets, clamps and mufflers.

1968-1974 Dual Exhaust Systems - Aluminized

1968-73 factory exhaust systems came with the secondary pipe welded to the muffler. Our Exhaust Systems are manufactured this way for originality, and ease of handling and installation. Original 1973-78 mufflers were round, thus visible below the rear valance. We offer your choice of Original Style round mufflers or Low Profile oval mufflers that are not as visible when installed.

Poly Adjustable Strut Rods

Designed to help keep rear tires in correct vertical alignment, Adjustable Strut Rods help maintain proper camber throughout your suspension's range of travel to reduce tire wear and improve handling. These rods are stronger than stock and feature polyurethane bushings for long life. Best of all, there are no adjustment cams. Simply lengthen or shorten the strut rods by turning them, then tightening the jam nuts – that's it! Poly Adjustable Strut Rods give you triple the adjustment range of stock camber adjustment rods.

Poly Smart Strut® Kits

Polyurethane Smart Struts® eliminate unwanted change in rear wheel camber. With 2 1/2" of wheel travel, the rear camber can change over 2°. The same car equipped with Smart Struts® has measured camber change of less than one-tenth of a degree through over 5 1/2" of wheel travel. Smart Struts® are guaranteed to improve handling and reduce uneven tire wear. They also reduce hub bearing wear by reducing side loading. Limited lifetime warranty.

Poly Smart Strut® Kits include:

- Custom Strut Rod Mounting Bracket
- Camber Adjustment Cams
- Polyurethane Rod End Bushings
- All Hardware & Instructions

Additionally, the Late 1977 version has a metal reinforcement embedded in the weatherstrip that goes above the door window glass. The Early style does not have this reinforcement. It is flexible around the entire circumference.

You may order, as a replacement, one each of #**2348**, #**2349**, and # **X34801**. Our Kits, however, contain #**X2652** to provide total accuracy. In 1973, the design was changed and the lower weatherstrip section was eliminated. Therefore, #**X34801** is correct and will provide complete sealing.

Note: In 1968-72, the pillar post weatherstrips were originally a one-piece unit with upper and lower sections combined (like #**X2652**). You may order, as a replacement, one each of #**2348**, #**2349**, and # **X34801**. Our Kits, however, contain #**X2652** to provide total accuracy. In 1973, the design was changed and the lower weatherstrip section was eliminated. Therefore, #**X34801** is correct and will provide complete sealing.

1968-1979 Corvette Selecta Speed Wiper Kits

Detroit Speed's Selecta Speed Wiper Kits available from Corvette America! A downpour of rain will no longer hinder your ability to clearly see the road. This kit provides you with the performance and convenience of a late model wiper system in a package that easily and cleanly mounts in your car. The wiper kit contains a low profile, seven-speed wiper motor with 5 delays, low speed, and high speed, rotary switch, adapter plate, and wiring harness. The CNC aluminum adapter plate mounts the wiper motor to the stock firewall bolt pattern and requires no permanent modifications to the vehicle. The supplied wiring harness uses the factory wiper grommet opening and requires no cutting of the factory harness. This allows owners the option to return their classic Corvette back to its original configuration if desired, leaving no holes or spliced wires behind.

NEW IMPROVED! **Easier Installation:** The wiper switch and wiring harness plug into a wiper control module located under the dash. The wiper motor connector is already installed on the wiring harness, saving you from having to pin out the wiper motor connector. The wiring harness has also been simplified with new wiper control module design.

Push Button Windshield Washer Function: The seven position rotary wiper switch now features a push button function for a windshield washer option. Once the push button function is released, the wiper blades cycle 3 times just like your current OEM vehicle. The wiper blades then continue to operate at the last switch position. The wiring harness includes a weather pack connector/harness for an inline windshield washer pump.

Smaller, Lighter Wiper Motor: Modern OE wiper motor design is more compact for a clean look on the firewall giving additional clearance for your brake booster, valve covers, etc."
