All Corvette America 1994-1996 Sport Seat Covers are now sold only with new seat foam. Due to the procedure the manufacturer used to attach original seat covers to the foam, it is extremely difficult to remove original covers without severely damaging the original seat foam, resulting in a poor installation of new seat covers. As an added service to our customers, and to prevent this problem, we now sell these seat covers only with the foam. In addition, the seat covers will be attached to the new foam by our professional installers in the same manner as the factory originals.

1985-1996 THROTTLE BODY AIRFOIL

Gain 12 Horsepower in 5 minutes!

Increases air flow by reducing power-zapping turbulence. For tuned port injection engines, the Air Charger straightens air flow as it enters the intake plenum, smoothing turbulent air and streamlining it for increased flow. The net result is additional power, better throttle response and faster acceleration. Installs easily without modifications. Attaches to throttle body with one screw, included.

The system takes pressurized air from the radiator cavity, sends it through the radiator shroud into the specially designed scoop and forces it into the sealed box of the Rammer. Installation requires just a simple cut-out on the radiator shroud. Hardware and instructions included.

DIRECT FIT Radiators

- Fit to Stock Hoses
- Greater Cooling Capacity
- 3-Year Manufacturer's Warranty

1984-1996 DIRECT-FIT ALUMINUM RADIATORS

Direct Fit Aluminum Radiators fit up to the factory hoses and original supports— no cutting, bending or installing different hoses. Black Ice Coating

BLACK ICE COATING FOR DIRECT FIT RADIATORS

Add **43581** to have your radiator coated with Black Ice. This special epoxy will adhere to the natural aluminum and never peel or flake. It is only 3-5 mils thick and will NOT affect the radiators ability to dissipate heat. The semi-gloss finish resembles the older enamels used on copper/brass radiators and it will give your engine compartment an OEM look.

1984-1989 REBUILT INSTRUMENT PANELS

A small bump in the road, a big headache when your instrument cluster goes dead or dark with the high-beam and turn-signal indicators on. If you can identify with this, you probably have a defective instrument cluster.

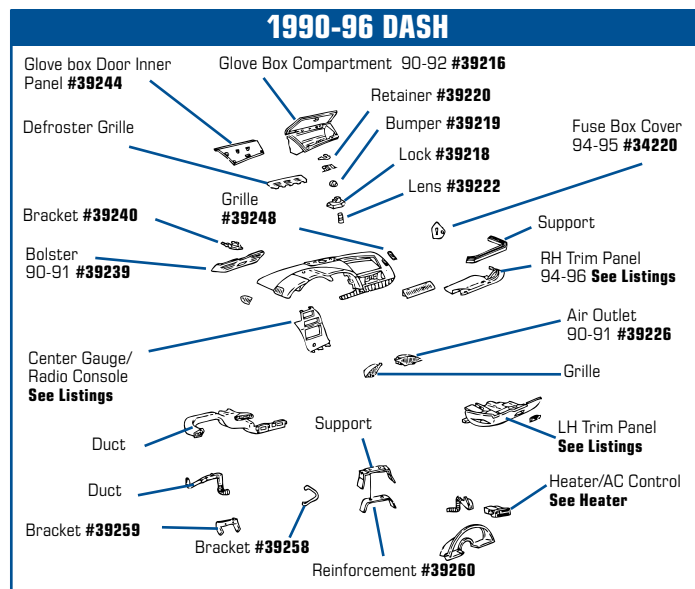

Other symptoms include a random display of a few segments only, which may or may not be accompanied by a burned-out "LCD" fuse. Frequently, a defective instrument cluster will drain a car's battery in a day or two.

Fortunately, Corvette America's 1984-89 Instrument Panel Repair saves you all the aggravation. Simply send us your defective panel and we'll have it restored to like-new condition. Or pay the refundable core charge and we'll ship you a refurbished instrument panel right away so you can keep on driving until you're ready to install your new panel.

1984-1991 THROTTLE POSITION SENSOR TEST HARNESS

The throttle position sensor tells your 1984-1991 Corvette how much air is being consumed by the engine and helps regulate fuel delivery. If it's not working properly, your engine can't operate at peak performance. By using this tool and a digital engine analyzer, you can check the function of your throttle position sensor.

1984-1996 CHAMBERED EXHAUST SYSTEMS

Add a more muscular sound to your C4 Corvette with our Chambered & Straight Aluminized Exhaust Systems. Constructed of 2.5" or 2.75" pipe (depending on system selected), the center sections of these dual systems feature an H-Pipe design, which produces a sound similar to the distinctive note of the 1965-1967 side exhausts.

These systems are specifically designed for the C4 and also feature LT-1 or Stainless Steel tips for a high performance look to match their sound. Systems install just behind the catalytic converters.

You'll find them easier to install and they have better resistance to minor bumps. Look for "E-Zee Fit" on available items in this section.

1984-1996 HOOD / DISTRIBUTOR SEAL PAD SETS

The factory started using these hood seal pads on the 1993 ZR-1 and it turned out to be a great improvement. This improvement is now available for your 1984-1996 Corvette. The pad set helps prevent hood vibration and keeps the paint on the rear of your hood from rubbing against the firewall. This easy-to-install set can be attached quickly with self-adhesive backing [included].

1986-1996 DECK PROTECTORS

Prevent your softtop or hardtop from scratching your Corvette's rear deck. Deck Lid Protectors are static cling film (no adhesives needed), and they're die-cut for your model year. They cover the area where your top comes in contact with your rear deck to keep it like new.

FRONT SWAY BAR KITS

The fastest and easiest way to refine handling and get rid of body roll in your 1985-96 Corvette is to bolt on an anti-sway bar system. These anti-sway bars link the left and right sides of your Corvette together. This transfers energy to the opposite side of the vehicle during hard cornering and resists body roll. The end result is much better handling while turning. Kits are easy to install and include grade-8 hardware, polyurethane bushings and instructions.

1988-1996 NEOPRENE FENDER SEALS

Install these seals and keep your engine compartment clean and dry. They mount over the shock towers using factory and supplied fasteners. Installation of the die-cut, non-tearing, neoprene seals takes just minutes. Neoprene construction makes these seals stronger and more durable than other similar available products.

Composite Monospring

The composite monospring is the ultimate replacement for the aging multi-leaf steel spring. It is designed to ride better, react faster, and last longer than conventional multi-leaf steel springs. It is composed of unidirectional fibers that are bonded together with a special epoxy matrix. By nature, this fiberglass is more elastic than steel and will not fatigue the way a multi-leaf steel spring eventually must. Because it does not contain layers of steel like a standard multi-leaf spring, there is no friction between each leaf to slow reaction to changing road surfaces.

Smart Strut Kit with
Polyurethane Bushings

POLY SMART STRUT® KITS

Polyurethane Smart Struts® eliminate unwanted change in rear wheel camber. At 2 1/2" of wheel travel, the 84-96 Corvette rear camber setting changes over 2°. The same car equipped with Smart Struts® has measured camber change of less than one-tenth of a degree at over 5 1/2" of wheel travel. Now that's proven results! Smart Struts® are guaranteed to improve handling and reduce uneven tire wear. They also reduce hub bearing wear by reducing side loading. Limited lifetime warranty.

Poly Smart Strut® Kits include:

- Custom Strut Rod Mounting Bracket
- Camber Adjustment Cams
- Polyurethane Rod End Bushings
- All Hardware & Instructions

Attention 1986 Corvette Owners:

Early 1986 tops have a cone shaped alignment pin located out-board of a threaded mounting hole. The center-to-center distance between the alignment pin and the threaded hole is 2". Late 1986 tops don't have the alignment pin. Instead, a metal bracket with a threaded mounting hole is used. The bracket is held in place by two torx head bolts. Distance between bolts is 2 1/4".

1984-1996 DRIP MOLDINGS

Prevent water from dripping into your interior and onto your seats after a rain shower or wash. Finally, 1984-96 Drip Moldings solve this small but very annoying problem! Drip Moldings are low-profile pieces of plastic trim that you place on your Corvette above the doors. Once installed they control the direction of run-off water by channeling it off the top and down the sides away from your interior. Simply snap into place.

1984-1996 COUPE REAR WINDOW WEATHERSTRIP

The coupe Rear Window Weatherstrip was originally designed by GM in two pieces that were bonded together in the corners. Over time this design has often led to air and water leaks as the bonds break and the weatherstrip separates into two pieces.

Corvette America is now pleased to offer two designs of the Coupe Rear Window Weatherstrip. The original design is offered in our Import Weatherstrip line under part **#X2172** and includes upgraded adhesive in order to maintain the corner bond longer.

Additionally, Corvette America is pleased to announce a New upgraded version in our USA made weatherstrip line under part **#52335**. This improved product was designed, engineered, and manufactured right here in the USA. This design eliminates the bonded corners by using a one piece molded corner. This design is more durable and will last longer than the original design Coupe Rear Window Weatherstrip.

C5 SKID PLATE STIFFENERS

Don't count on stock skid plates to take the ouch completely out of parking curb scrapes... they're just not sturdy enough to stand up to the task. **And, once bent, factory plates could cost hundreds to replace.**

Our stiffeners can save the day by bolting on over your existing plates and preventing damage in the first place. They install in less than 15 minutes. No drilling required. All hardware included.

1997-2004 DIRECT FIT ALUMINUM RADIATORS

Our Direct Fit Aluminum Radiators feature a double row of extra wide, high-quality tubes, special louvered fins and press formed end tanks. Cores are furnace brazed for the ultimate in tube to header welds without the use of any epoxy. Each radiator is then fit to the original core supports and factory hoses. That's right, no cutting, bending or installing different hoses to make it work. Best of all, they cost much less than other Aluminum Radiators that do require modification to use. Backed by a 3-year Manufacturer's Warranty.

43581	97-04	Black Ice Coating	\$60⁹⁹

Add **43581** to have your radiator coated with Black Ice. This special epoxy will adhere to the natural aluminum and never peel or flake. It is only 3-5 mils thick and it will NOT affect the radiators ability to dissipate heat. The semi-gloss finish resembles the older enamels used on copper/brass radiators and it will give your engine compartment an OEM look.

Get even more performance from your exhaust upgrade by adding this X-Style Crossover Pipe.
