### REAR DIFFUSERS

Corvette America proudly offers C6 Rear Diffusers made by APR Performance. APR Performance Rear Diffusers integrate with the rear bumper area to reduce overall lift and drag. Formed in the autoclave at high temperatures, APR Performance Rear Diffusers are made from prepreg carbon fiber materials to be strong and lightweight. APR Performance Rear Diffusers are molded to fit factory rear bumpers and underbody areas. Mounting holes, and all necessary hardware are included with every APR Performance Rear Diffuser.

**ENGINE CAP COVER KITS**

Each cap was designed to fit the OEM cap perfectly. You have the flexibility to use them as a slip on/off design. They can be left on 100% of the time & removed if needed. With the provided VHB adhesive disks, you can also attach them for a permanent bond making them one with the OEM cap. The 100% billet caps give you the flexibility to align the graphics as you like. Made in the USA.

Exhaust Crossover Pipe

**2005-2008 CORVETTE X-STYLE CROSSOVER PIPE**

Get even more performance from your exhaust upgrade by adding this X-Style Crossover Pipe. This precision component balances exhaust pulses, therefore aiding in the ridding of waste gas from the cylinders. This scavenging effect allows for better air/fuel flow on intake, thus providing enhanced power delivery, as well as a smoother exhaust note. Installation of this component will require the cutting of stock pipe.

## FRAME

### UNDERGUARDS

Manufactured from 1/2" aluminum, Underguards mount under the C6 rocker panel area to protect the body from speed bump damage or damage from large objects in the road. They bolt to the frame rails in minutes with the supplied hardware and instructions. They also serve as permanent jacking pucks to eliminate the need for separate pucks. **A great investment that can prevent potentially costly body damage to your Vette.**

**REAR SPOILER - MADE BY APR**

APR Performance Rear Deck Spoilers integrate with the rear deck to help fine-tune downforce balance. Formed in the autoclave at high temperatures, these spoilers are made from prepreg carbon fiber materials to be strong & light weight. Molded to conform to factory rear deck lids. Designed to re-direct drag-inducing turbulent air away from the rear bumper area.

#52831 GTC 500 - C6 SPEC

**2005-2013 Wings**

All GTC Series wings feature an aerodynamic 3D designed airfoil shape to obtain the optimal balance of downforce. This design allows for a reduction in drag, yet maintains an ideal level of downforce. Computational Fluid Dynamics (CFD) Analyses were performed on these wings to support validation of their aerodynamic design.

Each GTC Series airfoil is composed of lightweight and durable carbon fiber reinforced polymer (CFRP) or fiber reinforced polymer (FRP) composite materials. CFRP models contain prepregated woven carbon fiber sheets for superior strength and low weight. FRP models contain woven prepregated glass fiber sheets for high strength at reasonable weight. All CFRP and FRP airfoils are made using prepregated composite manufacturing processes (i.e. high-temperature autoclave and vacuum bagging) in high- quality aluminum molds.

Each GTC Series airfoil is composed of lightweight and durable carbon fiber composite. Supporting the carbon fiber airfoils are 10mm aircraft grade 6061 billet aluminum pedestals that come in a flat black powder coat finish.

## GURNEY FLAPS

Gurney flaps are available for all APR Performance GTC Series (200/300/500) wings. These are super lightweight, made using pre-preg carbon fiber processes, and conform perfectly to the contours of the GTC series 3D airfoils. They are easily attached using the included double-sided tape.

**BRAKES**

**PERFORMANCE FRONT BRAKE DUCTS KIT**

This Front Brake Ducts Cooling Kit for base Corvette models includes brake ducts and deflectors that transport air from the front grille through the wheel wells to help cool the front brakes and expel heat. This can help increase airflow by 16% to improve stopping performance by reducing temperature and brake fade.

- 52554** 16-18 Performance - GS, Stingray & Z06 ..... \$279<sup>99</sup>

**BRAKE PADS**

Hawk Performance's HP Plus brake pad compound is ideal for Autocross and Track Day drivers looking for a high performance race compound that can take the heat of the track and get you home safely without having to change the pads.

#43601

HP Plus utilizes a unique Ferro-Carbon, high-tech friction material that was developed and manufactured for sport driving in autocross, Solo II and "track day" applications. The Ferro-Carbon formulation offers lower wear rates and higher torque values than other competitive materials. Extremely high coefficient of friction makes HP Plus the perfect upgrade over stock for high performance streetcars used in autocross competition or that experience repetitive, heavy braking.

#56179 2014 Front Brake System - 14" Extreme+ Black 6 Piston Caliper

### Z06 BRAKE KITS FOR Z51 - PISTON UPGRADE

The Z06 standard Brake Upgrade Kit for Z51 vehicles features two-piece iron-slotted rotors measuring 370 mm x 34 mm in the front and 365 mm x 26 mm in the rear, with aluminum mono-block 6-piston and 4-piston fixed calipers, respectively. The front calipers feature vented pistons to help improve pad and brake fluid cooling, including pads 39% larger than those found on the stock Z51 vehicle. These calipers offer differentiated piston diameters of 30, 34 and 38 mm (leading to trailing) for even pad pressure for improved pad wear. Note: These brakes will not fit under stock base or Z51 wheels. Requires a minimum 4 mm wheel clearance between the outboard face of the caliper and the inner wheel spoke. This application is for off-road use only because the stock Z51 wheels do not fit over the Z06 brakes. Any failures occurring as a result of the non-production wheels selected by the customer would not be covered under the limited warranty of the brake kits.

**STINGRAY Z51 FRONT & REAR BRAKE KIT**

Upgrade the brakes on your 2014+ Stingray to the greater capability of the Z51 package. It features slotted rotors with diameter measuring 345mm in front and 338mm in the rear. This kit increases the brake torque up to 57% on average. Also included are high-performance pads, which provide greater resistance to brake fade at track-condition rotor temperatures over 500°C. Requires spacers. Note: The mass dampers were removed from the stock Z51 pads in order to fit inside of the base Stingray wheels. Mass dampers are used to tune the system for brake noise and therefore, this kit is not warrantied for noise performance. For off-road use only.

### LEVEL 3 - Z06 PERFORMANCE AERO KIT

Add a new dimension of downforce to your Corvette Z06. This Level 3 Aero Package is an upgrade for Level 2-equipped Corvette Z06 models. It adds elements from the Z07 Performance Package, including larger ends plates to the front splitter and an adjustable, transparent wickerbill on the rear spoiler for track use. With this package, Z06 delivers the most downforce of any production car that GM has ever tested. Fits all 15MY+ Corvette Z06 models.

**HOOD VENTS - CARBON FIBER**

Direct OEM Replacement. Excessive heat can cause major & expensive damage to critical components in a car. Engine bays, radiators, brakes, transmissions & differentials all need good air flow to help transfer away unwanted heat. APR Hood Vents help channel out excessive heat that builds up in the engine bay. Built using prepreg carbon fiber reinforced polymer (CFRP) composite materials for superior strength-to-weight ratio. APR Hood Vents add both function & "lightness" where it counts.

**Features:** Carbon Fiber Construction. This component is formed in the autoclave at high temperatures using prepregated carbon fiber manufacturing processes, for high strength & low weight. UV Resistant Coating Each Air Duct is finished with UV-resistant clear-coat paint for resistance against various environmental conditions (take care of this as you would take care of your vehicle's paint finish - polish then coat with good-quality wax or synthetic protectant).

## STINGRAY T1 SUSPENSION KIT

This suspension package was developed to help improve the on-track handling capabilities of your Stingray, including Z51-equipped models. It's been tuned with all-new stabilizer bars, lower control arms with stiffer handling bushings and track-optimized passive shocks. Roll stiffness has been increased (40% front and 20% rear).

**C7 WINGS - MADE BY APR**

All GTC Series wings feature an aerodynamic 3D designed airfoil shape to obtain the optimal balance of downforce. This design allows for a reduction in drag, yet maintains an ideal level of downforce. Computational Fluid Dynamics (CFD) Analyses were performed on these wings to support validation of their aerodynamic design.

Each GTC Series airfoil is composed of lightweight and durable carbon fiber reinforced polymer (CFRP) or fiber reinforced polymer (FRP) composite materials. CFRP models contain prepregged woven carbon fiber sheets for superior strength and low weight. FRP models contain woven prepregged glass fiber sheets for high strength at reasonable weight. All CFRP and FRP airfoils are made using prepregged composite manufacturing processes (i.e. high-temperature autoclave and vacuum bagging) in high quality aluminum molds.

Each GTC Series airfoil is composed of lightweight and durable carbon fiber composite. Supporting the carbon fiber airfoils are 10mm aircraft grade 6061 billet aluminum pedestals that come in a flat black powder coat finish.

## GURNEY FLAPS

Gurney flaps are available for all APR Performance GTC Series (200/300/500) wings. These are super lightweight, made using pre-preg carbon fiber processes, and conform perfectly to the contours of the GTC series 3D airfoils. They are easily attached using the included double-sided tape.
